

Franchise Lens

Franchisors and franchisees need a real time solution to maintain and manage their retail operations efficiently.

Our solution provides you that capability. Whether you have a new concept with a few locations or an established franchise with several hundred stores, we understand your unique challenges and can provide the service, features and flexibility you need to succeed.

Our solution provides franchisors broad visibility of enterprise business results as well as detailed transaction data from each location in real-time live. At each client site our system protects individual franchisee's data by ensuring that it remains secure and inaccessible by others in the franchise community.

Franchise owners and managers benefit from an easy to use real-time solution with minimal maintenance and system requirements using our smart client technology. It enables franchisees to maintain their unique store level items and pricing, and offers them the ability to implement special promotions and product offerings.

Highlights:

- Real time data streaming from stores to Head Office - Improve Business Intelligence
- Run Accurate reports anytime for any period
- Separate, combine or compare stores
- Increased accuracy of royalty payment collection
- Consistent calculation of net sales across all franchisees
- Forecast royalty collections in real-time
- View up to date stock availability (OH, OO, Transit) across all locations in real time
- n-Tier Architecture - Scale up in quickly within days not months
- Manage the creation and updating of products centrally.
